PRESIDENT OBAMA UNVEILS UNPRECEDENTED MAJOR MEASURES ABOUT THE ACT ON CLIMATE

CLEAN POWER PLAN

Washington DC, Paris, 04.08.2015, 03:56 Time

USPA NEWS - President Obama has released the final version of America's Clean Power Plan "The biggest, most important step we've ever taken to combat climate change". It's time to ACT ON CLIMATE. Press Conference at the White House, Monday August 2nd.

AMBITIOUS PLAN OF "CLEAN POWER PLAN TO REDUCE BY 32% OF CARBON EMISSIONS BY 2030-----" If you agree that we can't condemn our kids and grandkids to a planet that's beyond fixing. It's time to ACT ON CLIMATE .

For the first time, a political leader announces major measures for the climate, precisely in these hottest times for the planet. Obama discussed the "Clean Power Plan," the final version of Environmental Protection Agency regulations on Monday. The plan asks states by 2030 to reduce carbon emissions by 32 percent.

"No challenge poses a greater threat to our future and future generations than a changing climate." "Said President Obama announcing America's #CleanPowerPlan, the biggest step we've ever taken to #ActOnClimate.

"We're the first generation to feel the impact of climate change, and the last generation that can do something about it." "Said President Obama on why we need to ACT ON CLIMATE at the Press Conference of today,

The President Obama continues targeting the national effort needed to be made in reducing the part of polluting earth, by finding alternative energy, replacing coal by other resources eco friendly and battling emission of carbon in the atmosphere : "Today after working with states and cities and power companies, the EPA is setting the first ever nationwide standards to end the limitless dumping of carbon pollution from power plants," He continues targeting the national effort to has to be made in reducing the part of polluting earth "Washington is starting to catch up with the vision of the rest of the country. "

Such measures appear to agree with the current trends which depend even the survival of some endangered species, climate disruption that causes the imbalance on some ecosystems, pollution of some rivers and water points. The plan on the climate change could better resonate in the minds of Americans including California that is currently affected by wildfires. For as some disaster events occur in the four corners of the planet, alerting the imminence of serious ecological danger, is real. This is not a fantasy, nor a dream ...but it could become a nightmare for everyone, if nothing is done very soon.

It prevents the reactions of conservative political sides stand face to these proposals, which put them in anger when it comes to removing coal factories, which are major sources of financial revenue. A full ban of this henceforth obsolete and too polluting industry, will have both a political issue but a large-scale ecological challenge for the coming years.

President Obama then address a message for future generations in accordance with what he had stated a few weeks ago: "We're the first generation to feel the impact of climate change and the last generation that can do something about it," (See article REFUSING TO SAY THE WORDS CLIMATE CHANGE DOES NOT MEAN THAT IT IS NOT HAPPENING SAID OBAMA AT EVERGLADES PARK - See more at: <http://www.uspa24.com/bericht-3903/refusing-to-say-the-words-climate-change-does-not-mean-that-it-is-not-happening.html#sthash.TpNSXrJ4.dpuf>).

WE WILL REDUCE CARBON POLLUTION FROM POWER PLANTS BY 32% BY 2030 SAID PRESIDENT OBAMA

President Obama's CLEAN POWER PLAN will reduce carbon pollution from power plants by 32% by 2030. "Power plants are the single biggest source of harmful carbon pollution that contributes to climate change," Obama said. "Until now, there have been no federal limits to the amount of carbon pollution plants dump in the air." Former Florida Gov. Jeb Bush, one of the conservative opponent in politics, who is also running for president, said on Sunday climate change "will not be solved by grabbing power from states or slowly hollowing out our economy."

In the coming weeks, Obama will travel to Nevada to speak at the National Clean Energy Summit and later become the first sitting President to go to the Alaskan Arctic.-----Press Conference at White House and CNN News
