HM KING MOHAMMED VI OF MOROCCO DELIVERED A STRONG SPEECH & HIGH OBJECTIVES COP21

PART II 42% TO 52% RENEWABLE ENERGY

Paris, Washington DC, 20.12.2015, 00:00 Time

USPA NEWS - Morocco is ready to receive the COP 22 to be held in Marrakech from 7 to 17 November 2016. His Majesty the King of Morocco, Mohammed VI, has attended the opening of the COP21, which was held in Paris from November 30 to December 12, alongside 149 other heads of state from around the world.

Morocco is ready to receive the COP 22 to be held in Marrakech from 7 to 17 November 2016. His Majesty the King of Morocco, Mohammed VI, has attended the opening of the COP21, which was held in Paris from November 30 to December 12, alongside 149 other heads of state from around the world. His Majesty delivered a major speech on this occasion, both strong and committed his message to the international community as to empowering the survival of the planet for future generations. The ruler of the Kingdom of Morocco has also called some advances forward-thinking of his country, as is the case of political dams including 140 classified large dams legacy of the late King Hassan II and which one third were built these 15 last years. A major advanced, which made it possible to prevent drought and better control the channeling of water and preserve the ecosystem.-----

Here is the Part II of speech of HH King of Morocco, Mohammed VI on November 30th, opening session of COP21 in Paris, Le Bourget.

Your Excellencies, Ladies and Gentlemen

In keeping with this perspective - that of realism, anticipation and action - I should like to mention the strategy the Kingdom of Morocco has been implementing for more than half a century. Let us begin with water, the source of life and a crucial, daily concern of Moroccans. What would have become of Morocco in this respect, had it not been for the dam-building policy, which is a ground-breaking, far-sighted policy initiated in the early 1960s by my revered father, His Late Majesty King Hassan II. May he rest in peace. recognising the importance of this key accomplishment for Morocco's future, I have sought to reinforce it, and as a result Morocco now has 140 large dams, nearly a third of which have been built during the last 15 years. Thanks to the policy, Morocco is dealing successfully with the effects of drought whereas, in some developed countries, a mere delay in seasonal rainfall gives rise to a warning that an exceptional, severe drought is feared. The kingdom's committed action in this respect is also illustrated by the development of watersheds which make it possible to channel water without destroying or disrupting ecosystems. Morocco has also developed a responsible fisheries policy, which it defend-albeit with some difficulty-when negotiating with its partners, to protect its fish stocks. "His Majesty the King of Morocco, Mohammed VI, said as addressing the UN parties audience at COP21 opening session..
